

➤ How to update PROS CS Software to latest available version

APPLICATION NOTE

A074

This application note explain How to update PROS CS Software to latest available version.

How to update PROS CS Software to latest available version

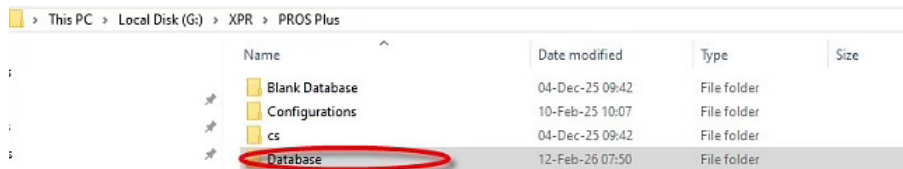

1. Latest PROS CS version is available for download on our website from the following link:

<https://www.xpr-solutions.com/software-firmware/>

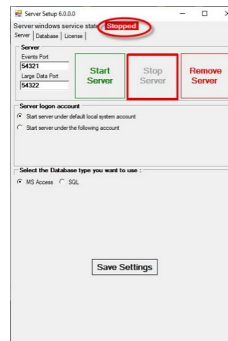

PROS CS/Last version/PROS CS Set up 6.4.6.0.exe or newer

Note 

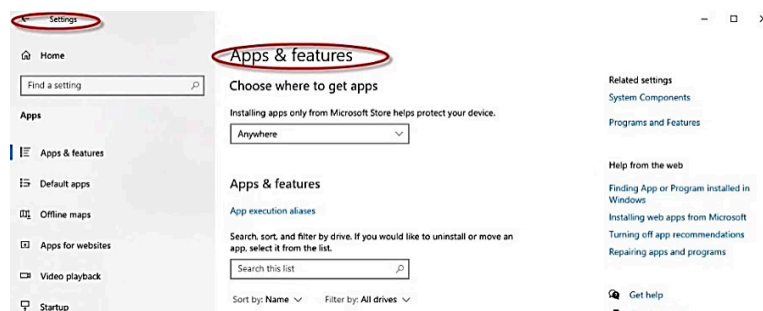

Before start updating the PROS CS Software make a copy of Database Folder for security reason. Below is the usual location of Database Folder at PROS CS installation location. Do not open the Database Folder, just make a copy of Database Folder.

3. Start PROS Server Setup and stop it from running.

4. On the PC where PROS CS is installed, in the “**Settings/Applications/Uninstall defaults**” section, uninstall SAP Crystal Reports from that PC and Microsoft Access Database Engine 2007 and 2010 (these will later be installed with the PROS CS V 6.4.6.0 setup or newer).

How to update PROS CS Software to latest available version

5. When starting the new setup, the installation location should remain the same as where PROS CS was installed before.

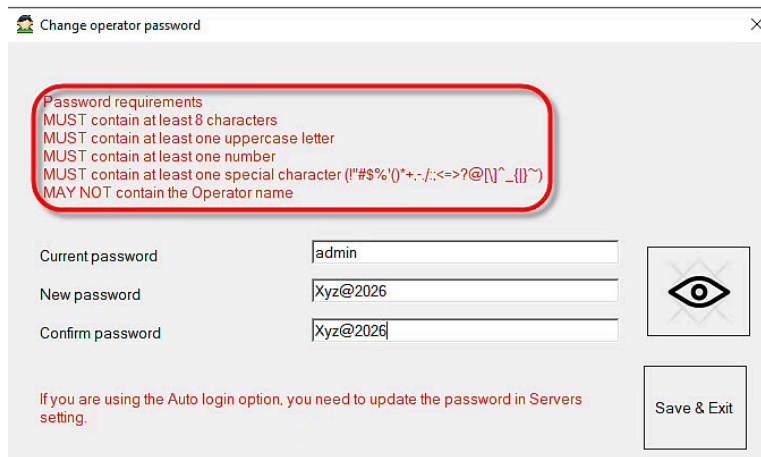

Note 

This is example for PROS Plus location:

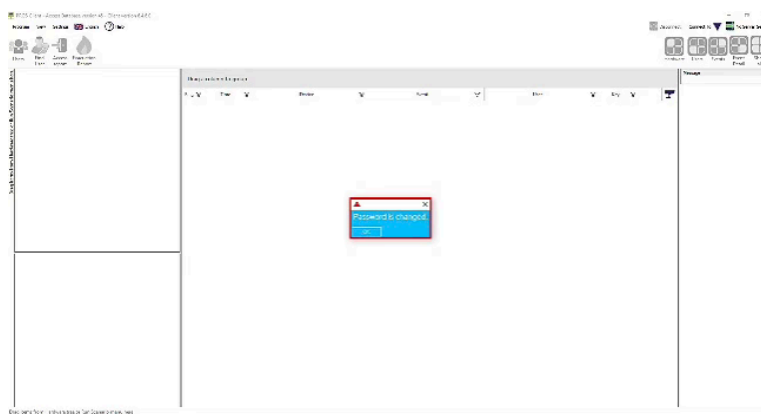

6. From version PROS CS 6.4.1 and newer PROS CS has a new feature, which is changing the default password (admin).

If on the current PROS CS version, the password is still under the default admin or doesn't match to password requirement explained with red letter at picture bellow, when starting PROS Client (PROS Server should also be running), when it finishes the loading procedure, pop up window will open where you will need to change the default password with a new one (the new window has instructions for the new one) password).

7. Since you will be updating PROS CS to version 6.4.6.0 and newer just follow the instructions on the screen when changing the default password.

8. After confirm password change click on **“Save & Exit”** tab and following message will appear at PROS Client:

How to update PROS CS Software to latest available version

9. Click on “**Ok**” tab and log in again at PROS Client.
